### Who We Are

The United Brotherhood of Carpenters is North America's largest building-trades union, with more than a half-million members in the construction and wood-products industries.

Its missions—recruiting new members and training all members—build on the union's nearly 130-year history of improving lives through hard work, education, and solidarity.

We recognize that for the union to remain strong, our signatory contractors need to succeed in today's highly competitive marketplace. They do that with workers committed to safety, productivity, and the proud legacy of our Brotherhood.
